

Dear customer,

I hope this email assists you in setting up your Solar.web account. For ease of use, I recommend using a computer or tablet to complete the initial setup, as the larger screen is more convenient than a phone. Once your account is created, you can download the Solar.web app on your phone and log in using the same credentials.

To register an account on the Fronius website, please follow these steps:

1) Click on the following link: [Solar web](#)

2) Click on the 'Login' button in the top right-hand corner (Do not press "Get Started Now").

3) Click on the 'Register Now' button.

24h format 18:30

I have read the [Terms and Conditions](#) and agree to them.

10) You don't need to get a Premium account.

**PREPARE TODAY FOR TOMORROW**

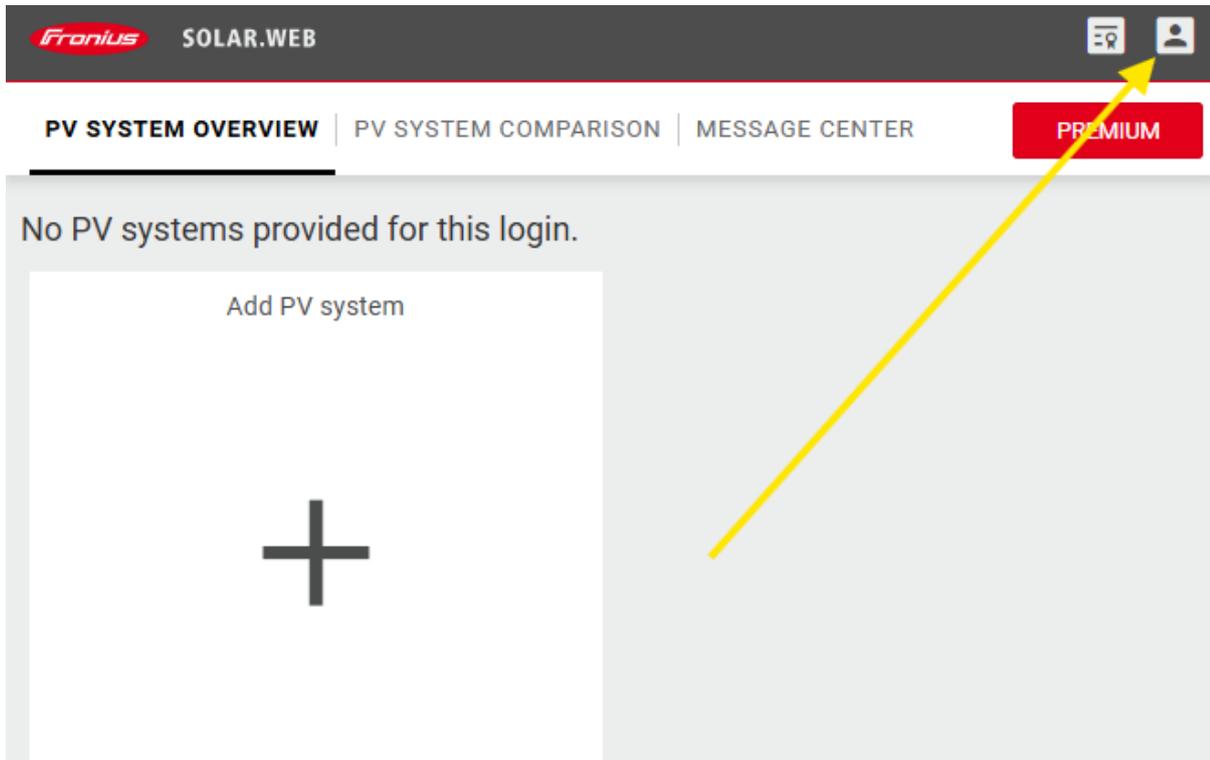

Know tomorrow's PV yield today with the new weather & yield forecast. Now included in Solar.web Premium.

[MORE INFORMATION](#) [GET PREMIUM](#)

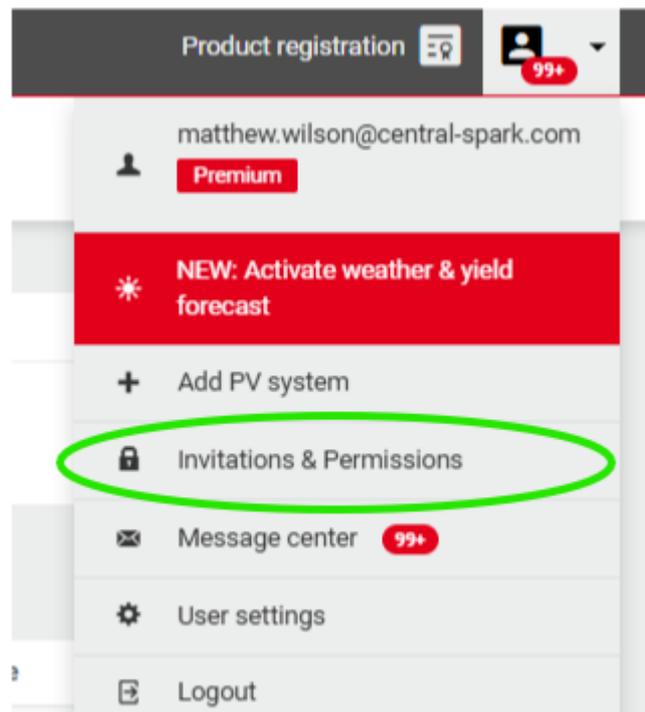

11) PLEASE STOP HERE if you are setting up your account before the installation date.

On the last day of installation, the installer will ask what email address you wish for your account. They will add this email address and then you will be able to log in again and continue with these steps.

Hopefully you will see a little red dot or number near the person icon in the top right corner.

12) Click on the drop-down menu and accept any invitations or permissions.

13) You should now be able to view your system.

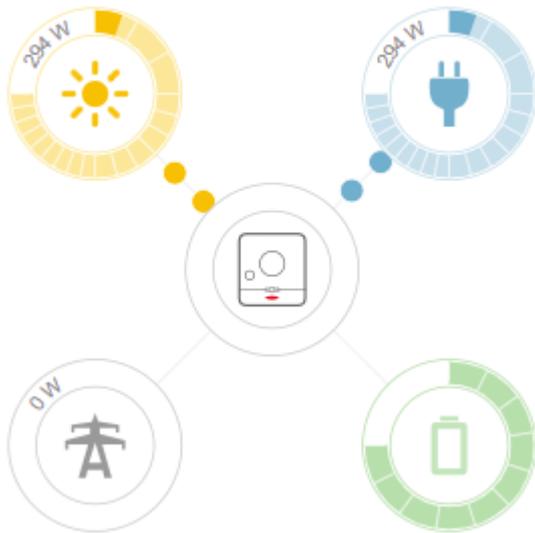

If you wish to set up individual logins for a partner/friend, please provide each email address needed to the installer. Or email [admin@central-spark.com](mailto:admin@central-spark.com).

Your solar power system can then be linked to the account, and you will receive free monitoring.

Please note that your Solar production will be the same as your home usage until Powercor completes their connection request.

eg) the image below shows 294W in yellow that your panels are producing, and the house is using 294W.

#### CURRENT POWER

Once that happens you will see your export to the grid and your solar production will be different to your home usage. Here is an example of what it will look like:

#### CURRENT POWER

Please contact us at [admin@central-spark.com](mailto:admin@central-spark.com) or 03 5462 5516 if you have any questions.
